# S2E – Country report

## Country analysis in 13 Member States

- national/regional FP7 participation patterns,
- push–pull factors for FP7 / H2020 participation,
- factors affecting the capacity to absorb cohesion policy funds,
- factors affecting synergies between the various funding sources for research, development and innovation.

## Methodology

- **Desk research** – analysis of existing strategie and analytical documents
- **Field research** – semi-structured interviews with key stakeholders of the R&D&I governance (16 interviews in total)

# Country report content

- Quality of the governance
  - Factors that support or limit the national participation in R&D calls funded by SF/ESIF
  - Push – pull factors for R&I performers to participate in FP7/H2020
  - Policy instruments facilitating the participation in FP7/H2020
  - Evaluation and monitoring mechanisms
  - Enhancing or limiting the synergies?
  - Take-up of public sector research results
  - Country tailored policy suggestions
- Regional analysis

# Country report content

- Quality of the governance
- Factors that support or limit the national participation in R&D calls funded by SF/ESIF
- Push – pull factors for R&I performers to participate in FP7/H2020
- Policy instruments facilitating the participation in FP7/H2020
- Evaluation and monitoring mechanisms
- **Enhancing or limiting the synergies?**
- Take-up of public sector research results
- Country tailored policy suggestions  
Regional analysis

# Enhancing or limiting the synergies?

## Key factors limiting the synergies between ESIF and H2020

- Lack of co-ordination between national and EU level programmes
- Lack of information and data sharing
- Different eligibility rules of ESIF and H2020 programmes
- Uncoordinated timing of potentially linked calls
- Uncoordinated focus of potentially linked calls
- Geographical focus difference – country-specific (territorial) vs. EU wide (space blind) programmes

# Enhancing or limiting the synergies?

## Suggestions to enhance the synergies between ESIF and H2020

- **Communication and co-ordination between national authorities responsible for the ESIF programmes and authorities responsible for the EU level programmes**
  - Direct coordination and communication between individual authorities in charge of ESIF programmes and EU programmes (H2020 mainly).
  - Shared information database.
- **Communication and co-ordination between NCPs and ESIF MAs**
  - Raise awareness of the other programmes and support.
  - Share actively their know-how – shared information database.
  - NCP to participate in specific events organized as part of the preparation of the OP and its funding instruments
- **Capacity building**
  - National programmes – fund a „grant / project office“
- **Guidelines, methodologies, calls and other documents in national languages**
